## BLOOD-LANCET

The Medical Goods Production Department produces blood lancets and plastic lab containers for biological materials. In the Department the Quality Management System acc. to has been introduced and certified by a third party (State Association of Ukraine "Politekhmed").

Since 1995 the company has been producing sterile blood lancets, and thanks to the quality products it has gained an unchallenged reputation among both domestic and foreign customers.

Blood-lancet is used for finger needling to sample blood in medical and preventive treatment facilities. Blood-lancets are manufactured serially according to TU U 13429839. 001-95. Blood-lancet confirms with Technical regulation for medical devices, the certificate of conformity

### Technical features:

- ∴ Material: Steel 12X18H9 according to GOST 4986; steel AISI 304 ASTM A240
- ∴ Weight: no more than 0,4 g
- ∴ Dimensions:
  - ∴ length: 38 mm
  - ∴ width: 5,3 mm
  - ∴ thickness: 0,15-0,20 mm
  - ∴ length of the needle: 3,3 mm

Puncture effort: up to 0,9 H (at possible 1,5 H)

### Packing:

- ∴ Blood-lancet is manufactured to be sterile in consume package (size of packing sheet 200x104 mm) of 20 pcs. with opportunity of free separation of each blood-lancet without breaking of package integrity.
- ∴ Group package is made into cardboard box (1000 pcs.).

Advantages:

- :- Little puncture effort (0,9 H at possible 1,5 H)
- :- Increased flexural strength
- :- Absence of sliding effect during palpating
